Bille in the Senate.

Early in the apping falls with singgish blood are accustomed to take anxaparilla, dandeline, punkroot and other natuseous doess toget in of askenant imparities. The patent medicine man eirculates his alimanes at this time of the year, threating them that better bores and under doorsulfs or flinging them into kitches areas, and contouring the signs of the stollar, the record of notable events and the monthly calendar, with prescriptions of purpatives, tebritinges and antisegities, together with illustrated narratives of extraordmary cures. The political bile of the dissatisfied rapabllean Senators at Washington has been un to be dosed off in conternity with this nance of the season. After the long winter of them is a senator and the same of the season. After the long winter of them is a senator and the same of the same of the need of apprents, and the first one to range himself is Timothy O. Howe, of Wiscousin, who delivered a speech posterody from manuscript, carvilly 'prepared and tumbhed to the Associated Press for das semination, in which during three tedions and tunished to the Associated Press for dis-semination, in which during three tedious hours he vituperated Mr. Hayes as a traitor to his party. It is announced that several other bilious Senators have been dosing them-selves and are prepared to follow in the same strain, and Mr. Conkling is named as one of the number, though we hope that the rumor which associates his name with this clumy line of assault upon the Executive may prove untrue.

uitree.

If the design of the movement is to break down President Hayes' administration it is useless, because the effect of it has been discounted in advance. So tar as the administration can be broken down by subh assulis it is so already. There has been no party behind it for a long while. Everybody who knows anything about Senator Howe-and here in New York he is best Known by his whitewashing some of the worst abuses in our Custom House a few years ago—knew already what his temper was toward the Prendent; and the same is true of the whole group of his discontented associates, embracing more than two-laptics of the republican members of the Senate. The unnot larm they can do no life. Hayes is to paralize his infinence with Congress, and this they have been doing pretly uncoessfully for six montain. If he were a passionate man, every many and the same they are the same they are the same through legitation, he would have sought an accommodation with these republican Senators long ago. They cannot force him to it by brutal attacks like Senator Hewe's, which add nothing to the pressure they came logether last Oxtober. The difficulty is that the accomplainment to the write and legislative brunches of a government. The executive coop, with its corn and olicable—the head of the same and the same and the same and the same and which can all eights of statemanship which appeared to the first pairs of the right of the r

How Will Peace Affect American Trade's Peace between Russia and Turkey on the one hand, and Spain and her Guban Insurgents on the other will, it is case to assume, have the effect of materially augmenting our trade with those countries. The idea that a great producing nation like these United Stites can permanently proper on the misfortunes of other nations with whom it has immate commercial relations was long since exploded. In our time nations and peoples are so closely associated in their commercial and social relations, that it is impossible to wound one vithout in serious was pringing in a greater or less degree all others. The important of the property of

esstuly in the markets of the world with England, Germany and France, in a wide range of manuscutured articles. Large orders for locomotives and truces, on account of the Rossian government, are now being filled in this country. The Russian government and the principal Russian railways contemplate the erection of gignatic elevators similar to those which facilitate the export of grain from this and other American ports. The Emperor of Russia has just sagnod cabatyre authorizing crutin New York-capitalists to proceed forthwith in the narra-portant privileges, amonating practically, as we understand, to a limited monopoly of the grain elevating boainess throughout the Russian Empire. This grant is to us commercially one of the first fruit of pence. If Russia finds it to her interest to cross the cocean in search of American Committees and American contractors to build her railroads and creect her devators, she is likely to prove for us a more valuable customer, while peacefully developing the resources of her immense empire than while wasting her aubiance in cipraview and creating wars.

Stewart's Hotel For Women.
Next Wednesday the Women's Hotel en Fourth avenue and Thirty-second and Thirty-third streets will be opened. The public is already familiar with the principal features of the policy that will be maintained at this gignatic house. It is intended as a home for women who support themselves by daily labor. The regulations will be such as govern first class hotels, except that all applying for board will be required to present a satisfactory written certificate of good chapacter and conduct from their employers or other persons known to the hotel managers. There are five hundred bedrooms in all and the board and lodging for each person will be at the rate of six digitars per week. This will not include batta and hundry work.

There is little doubt home for about one batta and hundry work.

There is little doubt home for about one batta and hundry work.

There is little doubt home for about one batta and when who cannot afford to pay more should thus be accommodated. But, meanwhile, thousand of girls and women who are obliged to earn their own living and who do not make as much per week as the price of the board and lodging amounts to will look with envious eyes upon their more favored sisters and sink under all the miseries of life as herectore.

What is needed is an immense home for this larger, power and inexpressibly wretched class of girls and women who live heaven alone knows how, and who have no prospect of ever earning more than the miserable pittame they are not present. Mr. Stewart's charity—first and with outless be appreciated.
